October 2024

FLEXI-cross 6th plenary and demo session

EBOS hosted the 6th plenary meeting of the FLEXI-cross project in Cyprus, where partners gathered to review progress, focusing on integration and toolkit development. A live demonstration for FRONTEX showcased the innovative solutions underway, marking significant advancements toward the project's objectives.

FLEXI-cross in a nutshell

The FLEXI-cross project is advancing innovative border control solutions to boost security and efficiency in screening both people and goods. Through flexible checkpoint deployment and mobile support for personnel, the project promotes adaptable border management while upholding strict security and data privacy standards. Tailored to the requirements of EU border authorities like Frontex, the toolkit integrates smoothly with existing systems, offering a modern and resilient approach to border control.

The Plenary meeting and Demonstration

The event that took place in Nicosia, Cyprus from the 2nd till the 3rd of October 2024, welcomed nearly all project partners for an in-person review of progress across key project areas. Work package leaders shared updates, with special focus on Work Package 2, where the core development of toolkit components is underway.

A central highlight was a roundtable discussion dedicated to integration—a critical priority as the project advances. EBOS, leading the integration task, detailed recent updates, including the installation and configuration of the integration server, deployment of all toolkit modules, and coordination between infrastructures within the integration environment.

The second day featured a live demonstration attended by representatives from FRONTEX and the FLEXI-cross project officer. In these sessions, use case leaders showcased their integrated modules and ran specific scenarios that demonstrated the toolkit's innovative and practical applications.

These live demos underscored the significant progress made, highlighting the toolkit's potential to meet key objectives and deliver impactful solutions. The collaboration and knowledge-sharing among project partners throughout the meeting further solidified the path toward successful project implementation, reinforcing FLEXI-cross's commitment to advancing border control solutions.

For more information about the project can be obtained from the project website and social media networks.
